PROFESSIONAL EXPERIENCE

SPARKLE INFOTECH

Surat City, INDIA

Web Developer

FEB 2023 – AUG 2024

- I am a versatile and skilled web developer with 1.5 years of experience in HTML5, CSS3, PHP, JavaScript, jQuery, and MySQL, as well as 3 to 4 months of experience in Laravel. I also have significant expertise in WordPress development, particularly with Elementor.
- Managed user accounts within the WordPress dashboard for enhanced security measures such as two-factor authentication.
- Ensured proper implementation of SEO best practices throughout the entire website structure including meta tags, titles and descriptions.
- Designed custom page templates that could be used by content authors when creating new pages or posts.
- Utilized various PHP frameworks (such as Laravel) to enhance application scalability and maintainability.

SMART INFOSYS

Surat City, INDIA

Web Developer

FEB 2025 – FEB 2026

- Delivered responsive and user-friendly web solutions using **HTML5, CSS3, PHP, WordPress, JavaScript, jQuery, and MySQL**, bringing total professional experience to **2.5+ years**.
- Developed complete WordPress projects **from scratch**, utilizing **Elementor and Beaver Builder** for custom layouts and responsive design.
- Integrated and configured **Contact Form 7** for form handling and **Post SMTP** for reliable email delivery.
- Created custom page templates and dynamic components to support flexible content management.
- Ensured consistent application of **on-page SEO standards**, improving website structure and organic reach.

Project Experience

- Operations Improvement Project
 - **Elementor Experience:** As a WordPress Developer, I have extensive experience using Elementor to create dynamic, responsive, and user-friendly websites. I have worked on numerous projects where I utilized Elementor's drag-and-drop interface to design custom layouts, and optimize content for performance and SEO.
 - **Managed end-to-end WordPress website migrations**, including data transfer, theme adaptation, and plugin integration, resulting in minimal downtime and seamless transitions.
 - **Laravel Experience:** With 3 to 4 months of experience, I have been working with Laravel to build custom applications and handle database migrations using Eloquent ORM. I have focused on creating scalable, efficient applications while also leveraging Blade templating for front-end integration.

PROJECT

<https://www.withvector.com/>

- **Implemented Blog Functionality:** Developed a blog with pagination, enhanced features using Elementor, integrated email, contact, and location links, and implemented social media sharing capabilities to boost user engagement.

<https://www.montanacommercialrealestate.com/>

- Contributed to a property management system enabling property dealers to list properties with details such as location, price, and owner contact information. Implemented features allowing property owners to list rental

properties and users to search by location. Responsible for identifying and fixing bugs to enhance functionality and user experience.

<https://www.kahalaresort.com/>

- Implemented **Advanced Custom Fields (ACF)** in a hotel booking project to enhance content flexibility. Successfully integrated and fetched dynamic values for room bookings, restaurant reservations, and media galleries, improving user experience by displaying customized content based on user preferences.

<https://www.hotwaterhero.co.nz/>

- Managed a Webflow CMS to display dynamic service data, allowing users to select and schedule services such as gas installation and cooler installation. Enabled users to choose plans based on their needs and schedule installations by integrating date and time selection features.
- This statement highlights your CMS management experience and your role in building a user-focused service scheduling feature

Alohafriday

- Built a WordPress website from scratch using **Elementor**, implementing **ACF** for dynamic content, **Contact Form 7** for user inquiries, and **Post SMTP** for secure and consistent email delivery.

Bilglaslagret

- Built a WordPress website from scratch using **Elementor**, integrating **WooCommerce** for e-commerce functionality, **ACF** for dynamic content, **Contact Form 7** for user inquiries, and **Post SMTP** for secure and consistent email delivery.

Dessconbuilders

- Built a fully responsive WordPress website using Beaver Builder and ACF for dynamic content management. Integrated Contact Form 7 for inquiries and Post SMTP for dependable email delivery. Designed the site to be accessibility-friendly for disabled users, focusing on usability, responsiveness, and inclusive design.

Catchyourbreath

- Built a WordPress website from scratch using **Elementor**, implementing **ACF** for dynamic content, **Contact Form 7** for user inquiries, and **Post SMTP** for secure and consistent email delivery.

Beaverbuild

- Built a WordPress website from scratch using **Elementor**, implementing **ACF** for dynamic content, **Contact Form 7** for user inquiries, and **Post SMTP** for secure and consistent email delivery.
